Volume 1 Issue 2 October 2005

For Private Circulation

Mr. U. Hocker, Group Chairman being welcomed to PMI.

Mr. U. Hocker, plants a sapling.

On 8th July 2005 Chairman of Phoenix Mecano AG, Mr. Ulrich Hocker visited Phoenix Mecano India. The photographs on this page show Mr Hocker being received at PMI and planting a tree.

PMI initiatives to increase the range of quality PM group products and services at competitive prices continues and in this edition we cover some of these initiatives. For example, panel mounting Uninorm series of enclosures now indigenously manufactured. Named Indinorm, these enclosures are available in three frame sizes, made of Noryl and now also in ABS. The range of aluminium IP 66 enclosures produced in India is now increased by three sizes as detailed on page 2.

In October, PMI launches the 'Easy Link' system, ideal solution for high speed conveying in packaging applications.

The Duomat (well recognised for hospital bed applications in India) and the Unomat series of actuators from Dewert designed for home beds is introduced by PMI to support the growing demand of lifestyle products.

PMI products are available across India through a network of eight dealers. To enable you to easily access PMI products, we detail their locations and addresses.

Please do let us have your feedback on Info-matrix and the product applications covered in this issue.

R Shrivastava  
(Managing Director Phoenix Mecano India)

### Indinorm INGN and INGA panel mounting enclosures

Panel mounting enclosures based on the BOPLA Uninorm series NGS enclosures, in three frame sizes, 96x48, 96x96 and 144x144 mm each with depths of 80, 100, 110 and 165mm. Designed to conform to DIN 43700, the INGN series is available in two configurations – the INGN built out of flame resistant Noryl conforms to V1 grade, while the INGA series built from ABS, in the same frame sizes, provides a more economical solution. The INGN/INGA series, the widest range of sizes of panel mounting enclosures manufactured in India, is suited for demanding applications with an aesthetic pleasing appearance, to meet international standards at competitive prices.

### Extension of range of Indigenously manufactured Aluminium enclosures

The range of standard Aluminium enclosures - with IP 66 protection - manufactured in India, covering eight sizes is now extended to cover three additional sizes, namely 80x180x60mm, 120x120x80mm and 120x120x90mm. This gives a choice of 11 enclosures in aluminium, with sizes extending from 80x82x56mm to 230x330x180mm, the widest range of aluminium enclosure manufactured in India.

### Pilot Enclosures from Rose

The Pilot enclosures from Rose built from ABS, are designed ergonomically, pleasing in appearance, provide protection to IP 66 and sturdy; hence suited for the most arduous conditions of use. For these reasons Schwing Stetter specifies Pilot enclosures in the most demanding conditions that its cement mixers on-the-move require.

## Duomat and Unomat actuators from Dewert for lifestyle home beds

The Duomat and Unomat series of actuators from Dewert are ideal for lifestyle applications in home beds.

A mere touch of the actuators' buttons can raise or lower the head or leg on one or both sides of the bed. Raising head-side of the bed is ideal for reading-in-bed or watching TV from the bed... while after a hectic round of shopping or tiring day at the office, raising the leg-side of the bed provides for a soothing position for the aching legs.

Also, for persons suffering from back problems or stiff joints, raising the head-side of the bed makes it easy to get up and out of the bed without assistance . . . for certain medical conditions this provides the perfect solution. PMI offers not just the actuators but also the slatted bed frame to provide easy solutions!

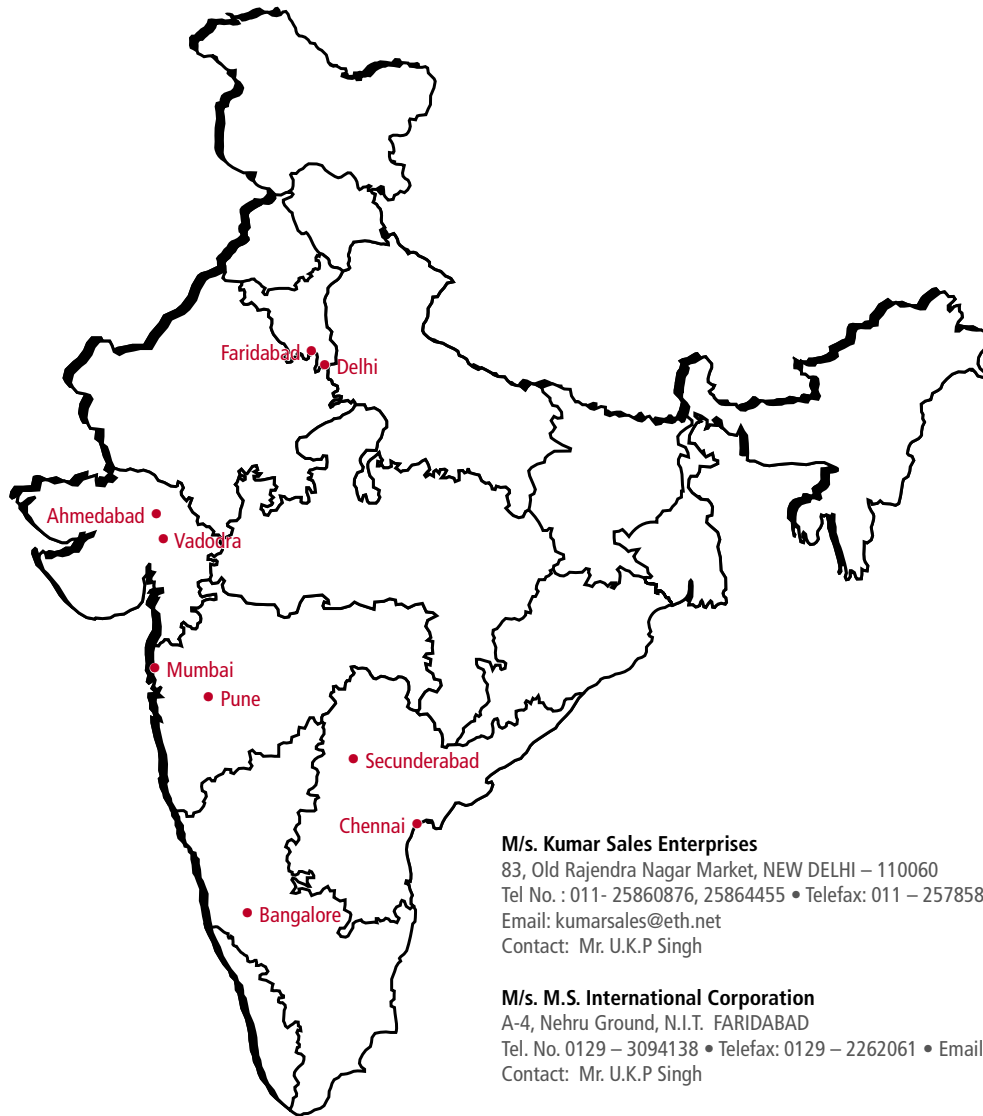

## 'Easy Link' series from Rose + Krieger

The liberalisation of the economy in India has ushered in a strong demand for consumer products, home appliances and ancillary industry products. High speed assembly & conveying are requisite, in order to meet this booming demand in a competitive environment. Phoenix Mecano India launches the 'Easy Link' high speed conveying system from Rose and Krieger which supplement the work stations and assembly line systems built from Blocan<sup>®</sup> profiles of Rose + Krieger.

These systems find applications in packaging lines of the food, FMCG, home appliances, pharmaceutical and auto ancillary industry.
